CMPT 276 – Assignment #1

Due: Tuesday, October 6th, 2023.

Submission: Team submission (not individual) and hand in a hard-copy **in class**.

Part 1:

Read the following article from The Atlantic and write a one-page critique with references.

- Format: Not to exceed one page, single-spaced, 12-point Times New Roman including references.

- LINK: https://www.theatlantic.com/technology/archive/2015/11/programmers-should-not-call-themselves-engineers/414271/

Part 2:

Present a deductive taxonomy of software development models.

Part 3:

Read the attached paper by Parnas and be able to summarize it in one or two paragraphs. This is to prepare you for examinations on this course. Nothing needs to be handed in.
